

XPRESS QUALITY
CUTTING & GRINDING
WHEELS

Upto 10 Times More Cutting
Than Ordinary Wheels

XPRESS QUALITY CUTTING & GRINDING WHEELS

COMPANY INTRODUCTION

We are leading suppliers of wide range of cutting and grinding wheels which are commonly used for cutting and grinding Iron, Stainless Steel and many other different metals. These products are widely used in building construction, general fabrication, aerospace, ship building and many other industries.

With the support of our high capacity manufacturing facility and highly skilled working team, we can meet any bulk demand of cutting and grinding wheels at really competitive price along with timely product delivery.

We have special technician team for inspection of the products and making the best quality products using advanced technology and equipments. These products are made as per International Standards.

We work closely with all sections of trade to understand their needs and seek out the finest abrasives across the world to make them available at their doorstep to assist and increase their performance.

4" - Cutting Wheel (107 x 1.2 x 16MM)

Features

- * High quality Abrasive grains.
- * For all types of metal and stainless steel.
- * 5 times more cutting than ordinary wheels.
- * Excellent durability and sharpness.
- * Produced under special technical staff using advanced technology and equipments.
- * Easy and fast cutting with excellent performance.

4" - Cutting Wheel with Double Net (107 x 1.2 x 16MM)

Features

- * High quality Abrasive grains.
- * For all types of metal and stainless steel.
- * 10 times more cutting than ordinary wheels.
- * Excellent durability and sharpness.
- * Produced under special technical staff using advanced technology and equipments.
- * Easy and fast cutting with excellent performance.

14" - Cutting Wheel (355 x 2.5 x 25.4MM)

Features

- * High quality Abrasive grains.
- * For all types of metal and stainless steel.
- * More cuts in less time.
- * Excellent durability and sharpness.
- * Produced under special technical staff using advanced technology and equipments.
- * Easy and fast cutting with excellent performance.

14" - Cutting Wheel with Double Net (355 x 2.5 x 25.4MM)

Features

- * High quality Abrasive grains.
- * For all types of metal and stainless steel.
- * More cuts in less time.
- * Excellent durability and sharpness.
- * Produced under special technical staff using advanced technology and equipments.
- * Easy and fast cutting with excellent performance.

4" - Grinding Wheel (100 x 4.0 x 16MM & 100 x 6.0 x 16MM)

Features

- * High quality Abrasive grains.
- * For all types of metal and stainless steel.
- * Excellent durability.
- * Produced under special technical staff using advanced technology and equipments.
- * Easy operation with excellent grinding performance.
